The Suryadatta Education Foundation was established in the year 1999, primarily to develop self motivated leaders to be successful in the challenging and vibrant global economy. The promoters and the core team have individually more than 20 years of rich corporate experience in various streams of Management, Information Technology, Media and Mass Communication, Corporate Consultancy, Value based Education, Training and Research. The Advisory and Governing Council of Suryadatta comprises of eminent academicians, professionals, industrialists, international consultants and social workers, who with their experience and knowledge guide the activities of the Foundation.

Suryadatta believes in holistic development of students, staff & society at large. As a part of this we feel proud to welcome International Personalities at Suryadatta Group of Institutes for conduct of Global Symposium on Challenges of 21st Century. Today, we live in an era where the world of opportunities co-exists with the world of risks. We have made significant strides since the beginning of this century in reducing poverty, finding scientific and technological solutions to

disease. connecting the world through communication technologies, and extending our reach to other planets. We may soon have remedy to cancer and establish space based solar power stations. We may determine biological and intellectual features of future human beings and have Artificial Intelligence to take care of our daily needs.

At the same time, we face risk of nuclear weapons being used in a war triggered by megalomaniac as the United States, Russia, China and North Korea speed up modernization of the weapons of mass destruction. We face dissolution of societies as in Iraq, Syria and Ukraine, We face terrorist attacks from most unexpected sources. We face the consequences of climate change, Covid pandemic depleting water resources, and sudden shocks in food supplies. Most of all, we fail to find solutions to the growing problem of inequality. Youth is an asset of any country & India is having 60% of youth. This will give all of us to mould, upgrade and prepare ourselves for forthcoming challenges of 21st century.

Suryadatta Temple of Learning

Technology: Digital India – Power to Empower – Roar of Digital Tiger

Digital India consists of three core components.

- Development of secure and stable Digital Infrastructure
- Delivering government services digitally
- Universal Digital Literacy

It is both enabler and beneficiary of other key Government of India schemes, such as Bharatmala, Sagarmala, Dedicated Freight Corridors, Industrial corridors, UDAN-RCS, BharatNet and Make in India.

India Mega Trend – Technology Challenges

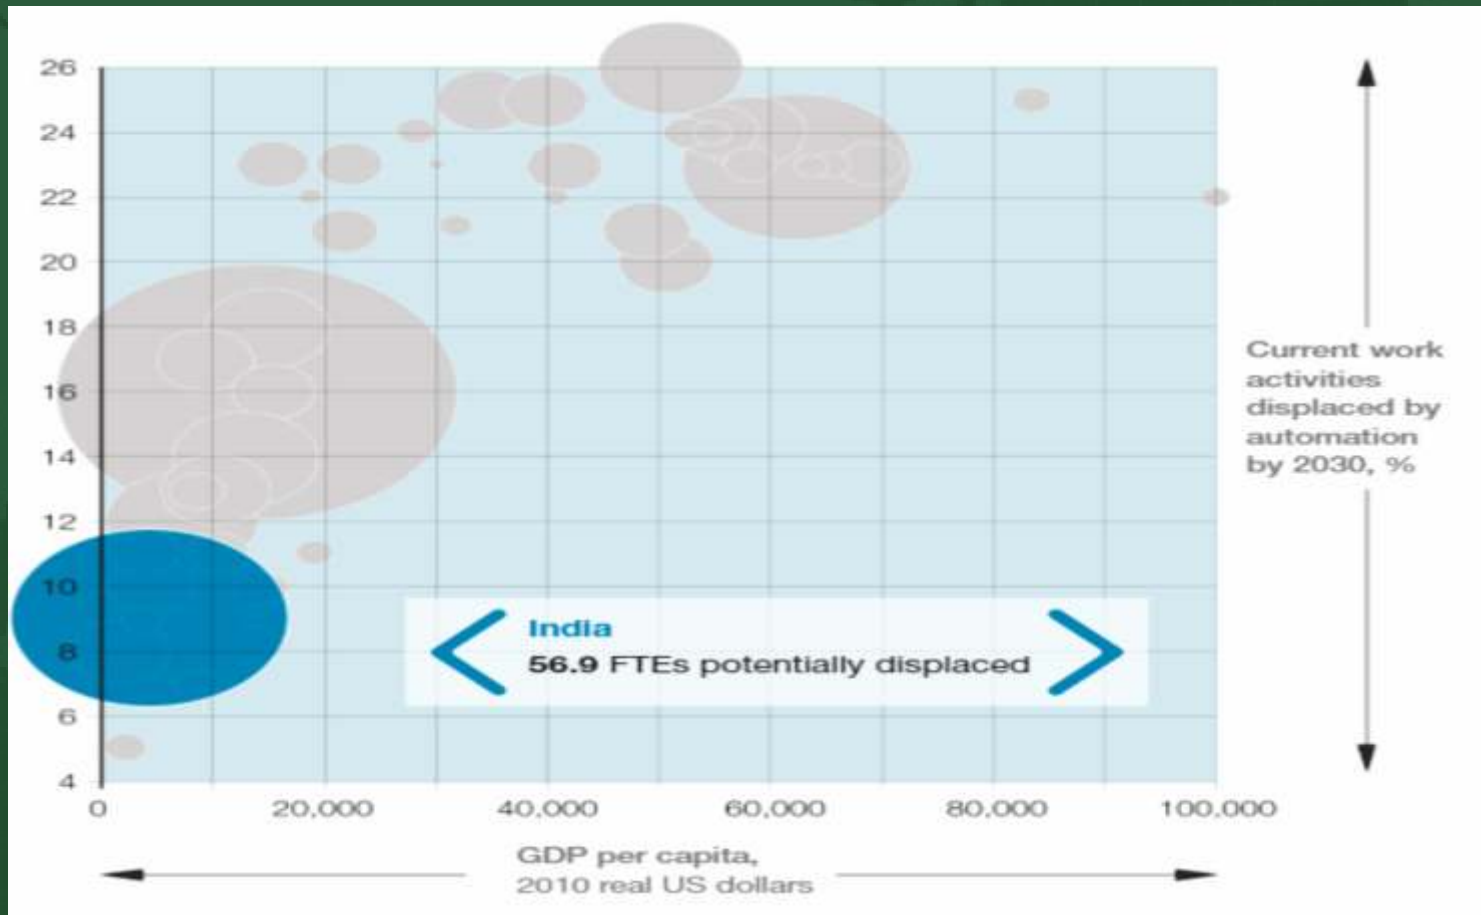

Workforce Transition by Automation to 2030

NOTE: These estimates of occupational shifts are based on scenarios of work displaced by automation to 2030 and of labour demand created in the same period by selected global trends, including rising incomes; growing healthcare spending for aging populations; stepped-up investment in technology, infrastructure, buildings, and energy; and the marketization of mainly domestic work that is currently unpaid, such as childcare and cooking. The data in this graphic use the midpoint of our automation-adoption range and reflect a "stepped-up" scenario, under which government and business leaders make explicit choices to boost job creation over the next 15 years. The data are not a prediction but rather indicative of some of our scenario findings

India Mega Trend - Roaring India

Automotive- Speeding towards the top three

China , India & ROW car markets are going to grow faster
 North America car sales to remain steady with volatility
 EU car market growth will come from Eastern EU countries
 Japan & Korea car sales to remain flat

India Mega Trend - Roaring India

Corporate R&D G1000 Spend – Global & Automotive \$ bn

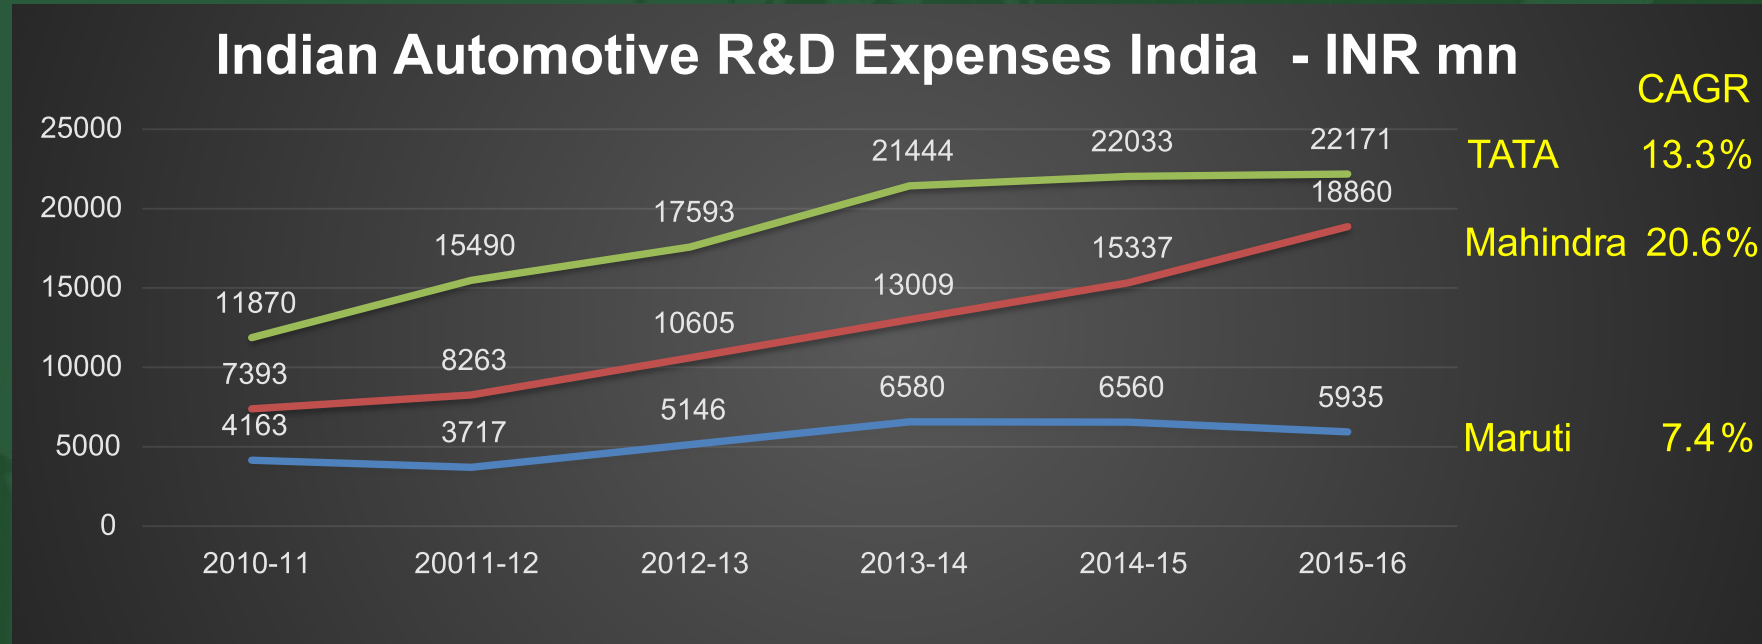

Automotive R&D spend is growing higher than Global R&D spend

This is due to sustainability regulations, driver & passenger safety, new features & technologies (connected car & self driving car) and customer is always looking for new style

Major growth is driven by focus on consolidating new global platforms to meet new requirements with embedded systems to achieve economies of scale, faster time to market and a larger number of variants. Common platform design reduces design changes, standardizes products globally and optimizes cost

India Mega Trend - Roaring India

Automotive- Speeding towards the top three

At present TATA, MAHINDRA & MARUTI SUZUKI have high R&D investment in India.

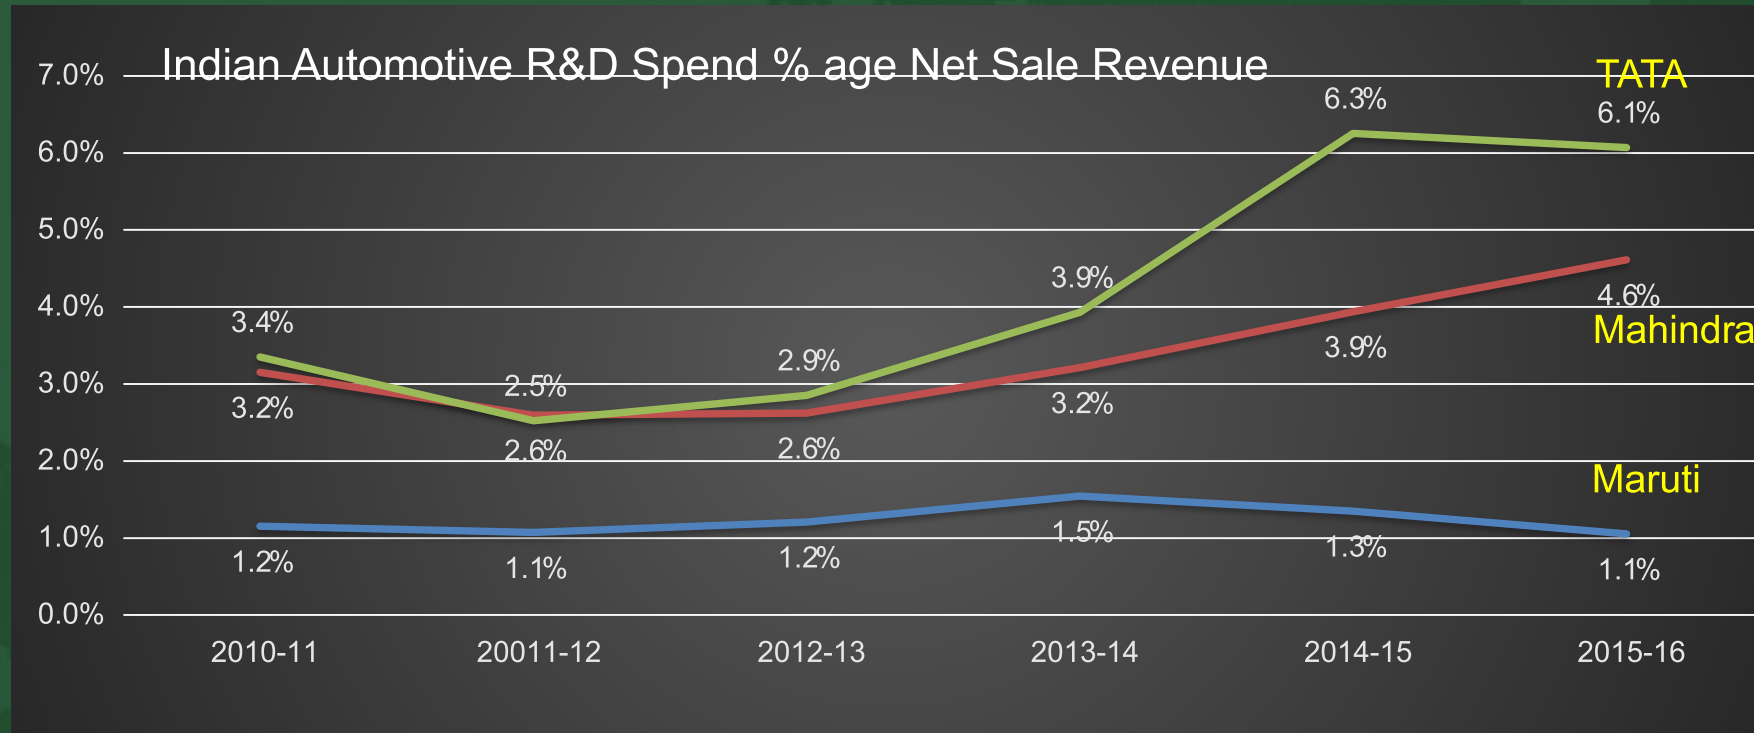

Tata & Mahindra R&D spend growth is high as they are facing tough competition from MNC.

Maruti Suzuki have created design capability & infrastructure in India & will increase its spend

Similarly most of MNCs now either have or are in process of developing design & development capability in India

India Mega Trend - Roaring India

Automotive- Speeding towards the top three

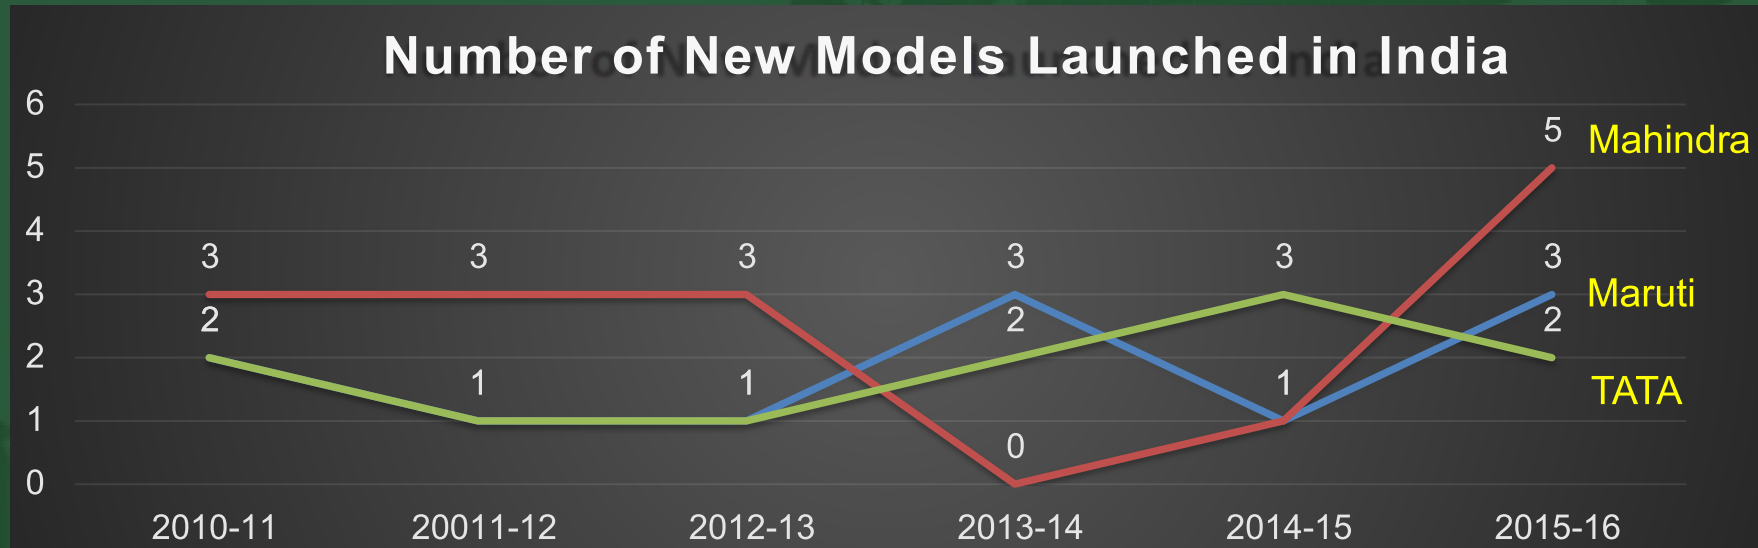

Indian Automotive R&D spend as % of net sales revenue is increasing substantially.

As sales revenue growth in India is increasing considerably hence Automotive R&D spend growth in India will be further higher. MNCs already started increasing their spends

India will become global automotive design hub for small & compact cars

India Mega Trend - Roaring India

Automotive- Speeding towards the top three

Customers are looking for new cars. Hence car companies are launching more than one product every year.

Each existing model to have refresh every alternate year as well as limited edition model for successful model.

Car models are expected to increase from 150 in 2015 to 180 in 2020 with new models/vehicle segments

Time to Market - Car companies are working to reduce time to market time by 30 %

Hence there is tremendous development pressure to bring new models every year as well as have refresh of existing models every two year. This will lead to increase in outsourcing
